

# GUIDED CAVE WALKS 2023

See caves in coral limestones that were formed more than 300 million years ago. Find out how they developed and visit one where you can see the fossilised bones of elephant, hippo, bison, lion, hyena and other animals that lived in the Dart Valley 100,000 years ago.

Browse our small, friendly museum and handle some of the bones. Find out about the bats that live in the caves and about the limekilns.

Be entertained and informed by our expert volunteer guides.

We're open every Wednesday and Thursday in August with walks at 11 am and 2 pm. We often get busy so we give priority to those who have booked in advance. Go to **Eventbrite** or to our website at <https://pengellytrust.org/> to make a booking.

Adult £6  
School age child £3

We are close to the A38 midway between Exeter and Plymouth at the top of Russels Lane, Buckfastleigh, TQ11 0DY. Look for signs at the foot of the Lane.
